Abstract

The present invention relates to a double-interface storage card and its conversion module, in which the interior of said storage card includes flash memory (or read-only memory) and microcontrol unit which is composed of USB interface controller, HOST interface controller and microprocessor matched correlated firmware, in which the HOST interface is used for wiring with product, and the USB interface is connected with computer USB interface (interface) by means of conversion module. It is convenient for computer and other electronic equipment to fetch or store data by using storage card.
